

Northern Coastal Plain / Piedmont Mesic Mixed Hardwood Forest (CEGL006075)

Indicator Species: *Fagus grandifolia*, *Liriodendron tulipifera*, *Quercus alba*, *Quercus rubra*, *Polystichum acrostichoides*, *Ilex opaca*

High constancy and high cover.

These species are both common in this community and because of their size and spread or frequency with which they pop up, they make up the bulk of the plants on site.

<i>Polystichum acrostichoides</i>	<i>Carya tomentosa</i>	<i>Nyssa sylvatica</i>
<i>Acer rubrum</i>	<i>Cornus florida</i>	<i>Quercus alba</i>
<i>Asimina triloba</i>	<i>Ilex opaca</i>	<i>Quercus rubra</i>
<i>Carpinus caroliniana</i>	<i>Liriodendron tulipifera</i>	<i>Quercus velutina</i>

High constancy, but low cover.

These species occur frequently but may only pop up here and there across the site. Another good set of species to get on site once you've covered the fundamental components above, but don't go overboard.

<i>Maianthemum racemosum</i>	<i>Sassafras albidum</i>
<i>Polygonatum biflorum</i>	<i>Viburnum acerifolium</i>
<i>Euonymus americanus</i>	<i>Parthenocissus quinquefolia</i>
<i>Prunus serotina</i>	

Low constancy, but high cover.

These species pop up less frequently but when they do, they tend to be relatively major components of the landscape either because of their size (in the case of trees and large shrubs), because they form large stands, or because they do well exploiting a certain niche on site.

Quercus montana

Low constancy and low cover.

These species are less common and tend to form smaller stands or be fewer individuals scattered around a site.

<i>Actaea racemosa</i>	<i>Carex rosea</i>	<i>Hydrangea arborescens</i>
<i>Arisaema triphyllum</i>	<i>Carex swanii</i>	<i>Ilex verticillata</i>
<i>Eurybia divaricata</i>	<i>Luzula echinata</i>	<i>Juniperus virginiana</i>
<i>Houstonia purpurea</i>	<i>Carya cordiformis</i>	<i>Lindera benzoin</i>
<i>Solidago caesia</i>	<i>Carya ovalis</i>	<i>Quercus phellos</i>
<i>Symphotrichum lateriflorum</i>	<i>Cercis canadensis</i>	<i>Rhododendron periclymenoides</i>
<i>Viola sororia</i>	<i>Chionanthus virginicus</i>	<i>Viburnum dentatum</i>
<i>Brachyelytrum erectum</i>	<i>Diospyros virginiana</i>	<i>Viburnum prunifolium</i>
<i>Carex laxiculmis</i>	<i>Hamamelis virginiana</i>
